Work Experience

ETERNALRAGE.NET — Remote
Fullstack Developer — June 2021 – Present
- Designed, developed, and enhanced UI designs using React and Material UI.
- Developed and optimized scripts in Typescript while improving server-to-client performance.
- Identified bugs and developed unit tests for scripts, ensuring reliability and performance.
- Collaborated with other team members on new designs and features while maintaining high quality.

GREENMANHOUSEPARTY.IO — Remote
Fullstack Developer — December 2021 – Present
- Designed and developed the main website using the MERN tech stack. (MongoDB/Express/React/NodeJS)
- Assisted in developing and writing smart contracts in the Solana ecosystem in Typescript.
- Implemented Next.JS on the website and improved performance by using server-side rendering principles.

Projects

Discord Management Bot
- Assisted in developing a discord management bot using the Discord.js library.

Meale Mobile App
- Developed a mobile app using the Flutter/Dart framework. Uses a tinder-like swiping system for nearby restaurants.

Jarvis AI
- Developed an AI program with Python, inspired by Jarvis in Ironman. Has the ability to search for information, play music, videos and even tell you a joke.

Phone Geolocator
- Developed a phone number geolocator using Python in order to obtain information regarding spam callers etc.

Orb Journaling Mobile App
- Developed a mobile app using the Flutter/Dart framework. Record your daily journals in the database powered by Firebase.

Education

RYERSON UNIVERSITY — **Toronto**, **ON**
Bachelor of Science in Biomedical Engineering — February 2022
